

Güntner and Refricomp mark 20 years of successful cooperation

Refricomp, a Spanish company founded in 1994 and located in Madrid, specializes in supplying high-quality components and services in the areas of Industrial Refrigeration and heat transfer processes.

From the start, Refricomp has been representing the brand Güntner in Spain and Portugal. Joaquin Andueza, General Manager of the company and renowned engineer and specialist in refrigeration, has come to embody the Güntner spirit in Spain with his quality awareness and expertise.

During these 20 years, even in economically difficult times, Güntner and Refricomp have realised many extraordinary projects by cultivating a close relationship with an open communication. This professionalism and open-mindedness of the Spanish engineers in general and Joaquin Andueza in particular form the foundation of their exemplary proximity to customers. Add to that the established team of high-profile engineers with many years of experience and junior staff with new, exciting ideas, and you have a formula for success.

With their clear focus on Industrial Refrigeration and acclaimed expertise, Refricomp is now more than ever the perfect Güntner partner. We are looking forward to the next 20 years of cooperation!

This wish was also clearly stated by Bernd Oehlerking, Head of Global Marketing of Güntner GmbH & Co. KG, who expressly came to visit Refricomp on this occasion to thank Joaquin Andueza for the continuously good and successful cooperation.
